LEGAL REGULATION OF INTERACTION BETWEEN THE PENSION BOARD OF UKRAINE AND THE POPULATION AND PUBLIC AUTHORITIES

Ukraine has positioned itself as a democratic, social legal state where the man, his life and health, honour and dignity, inviolability and security are recognized in Ukraine as the highest social value. In such a state, human rights and freedoms and their guarantees determine the essence and direction of the state activity. A special attention must be paid to socially vulnerable categories of the population, namely the elderly, the disabled, the unemployed, the homeless, etc. These segments of the population, in accordance with Article 46 of the Constitution of Ukraine, have the right to social protection including the right to security in cases of complete, partial or temporary disability, loss of breadwinner, unemployment due to circumstances beyond their control and also in old age, and in other cases provided for by law. This right is guaranteed by the Universal Compulsory State Social Insurance at the expense of insurance contributions of citizens, enterprises, institutions and organizations, as well as budgetary and other sources of social

security; the creation of a network of state, municipal, and private institutions to care for the disabled.

Today, an interaction between the Pension Board of Ukraine and other public authorities is not chaotic and has a more or less decent legal framework, which defines the forms and procedures for their co-operation in certain areas. At the same time, in our view, to ensure a more reliable and efficient interaction of the PBU with other public authorities we'll need to consolidate its foundations at the level of a relevant law. The above regulations mainly determine the procedural aspects of the interaction of the PBU with specific subjects in a strictly determined narrow direction. While the overall number of fundamental issues are rather abstract settled or even left unattended. Perhaps it would be appropriate in the Law "On Central Executive Bodies" to devote several articles to the organization and implementation of cooperation, in particular, to determine its basic principles, goals and objectives, etc.
